

**OUR PRODUCTS**

- absorbers
- aero-engine test facilities
- aircraft hush houses and run-up pens
- air handling units (AHU's)
- anechoic chambers
- audiology rooms
- baffles
- barriers
- booths
- broadcasting studios
- doors
- duct silencers
- enclosures
- gas turbine packages
- language training facilities
- louvres
- moveable walls
- music practice rooms
- partitions
- power plant silencers
- recording studios
- reverberation rooms
- road barriers
- rooms
- silencers
- sound absorption systems
- studios
- test facilities
- turboshaft test cells
- translation booths
- ventilation silencers
- vibration isolators
- voice-over booths
- windows

the world leader in noise control

company overview

IAC's Global Headquarters at Winchester in the UK

IAC America's Research and Manufacturing Centre in New York, USA

IAC Colpro Pty, Sydney, Australia

IAC China, Shenzhen, Peoples Republic of China

IAC's Research Centre in France houses an anechoic chamber, reverberant room and Kundt tube

IAC's production plant at Winchester, UK

## RESOURCES & FACILITIES

- Over 1000 employees, representatives and licensees worldwide
- Two modern, purpose-built Acoustic Research and Development Centres
- Manufacturing facilities of over 30,000m<sup>2</sup> (323,000ft<sup>2</sup>) in 6 countries

In addition to the facilities directly owned and operated by the company, IAC works in close partnership with several other manufacturing organisations, notably in Eastern Europe, Middle East and India. IAC also has a large network of technical sales engineers, agents and distributors, offering advice and assistance to customers around the world. Several of these manufacture IAC products under license.

Bystronic Laser able to cut up to 25mm thick mild steel

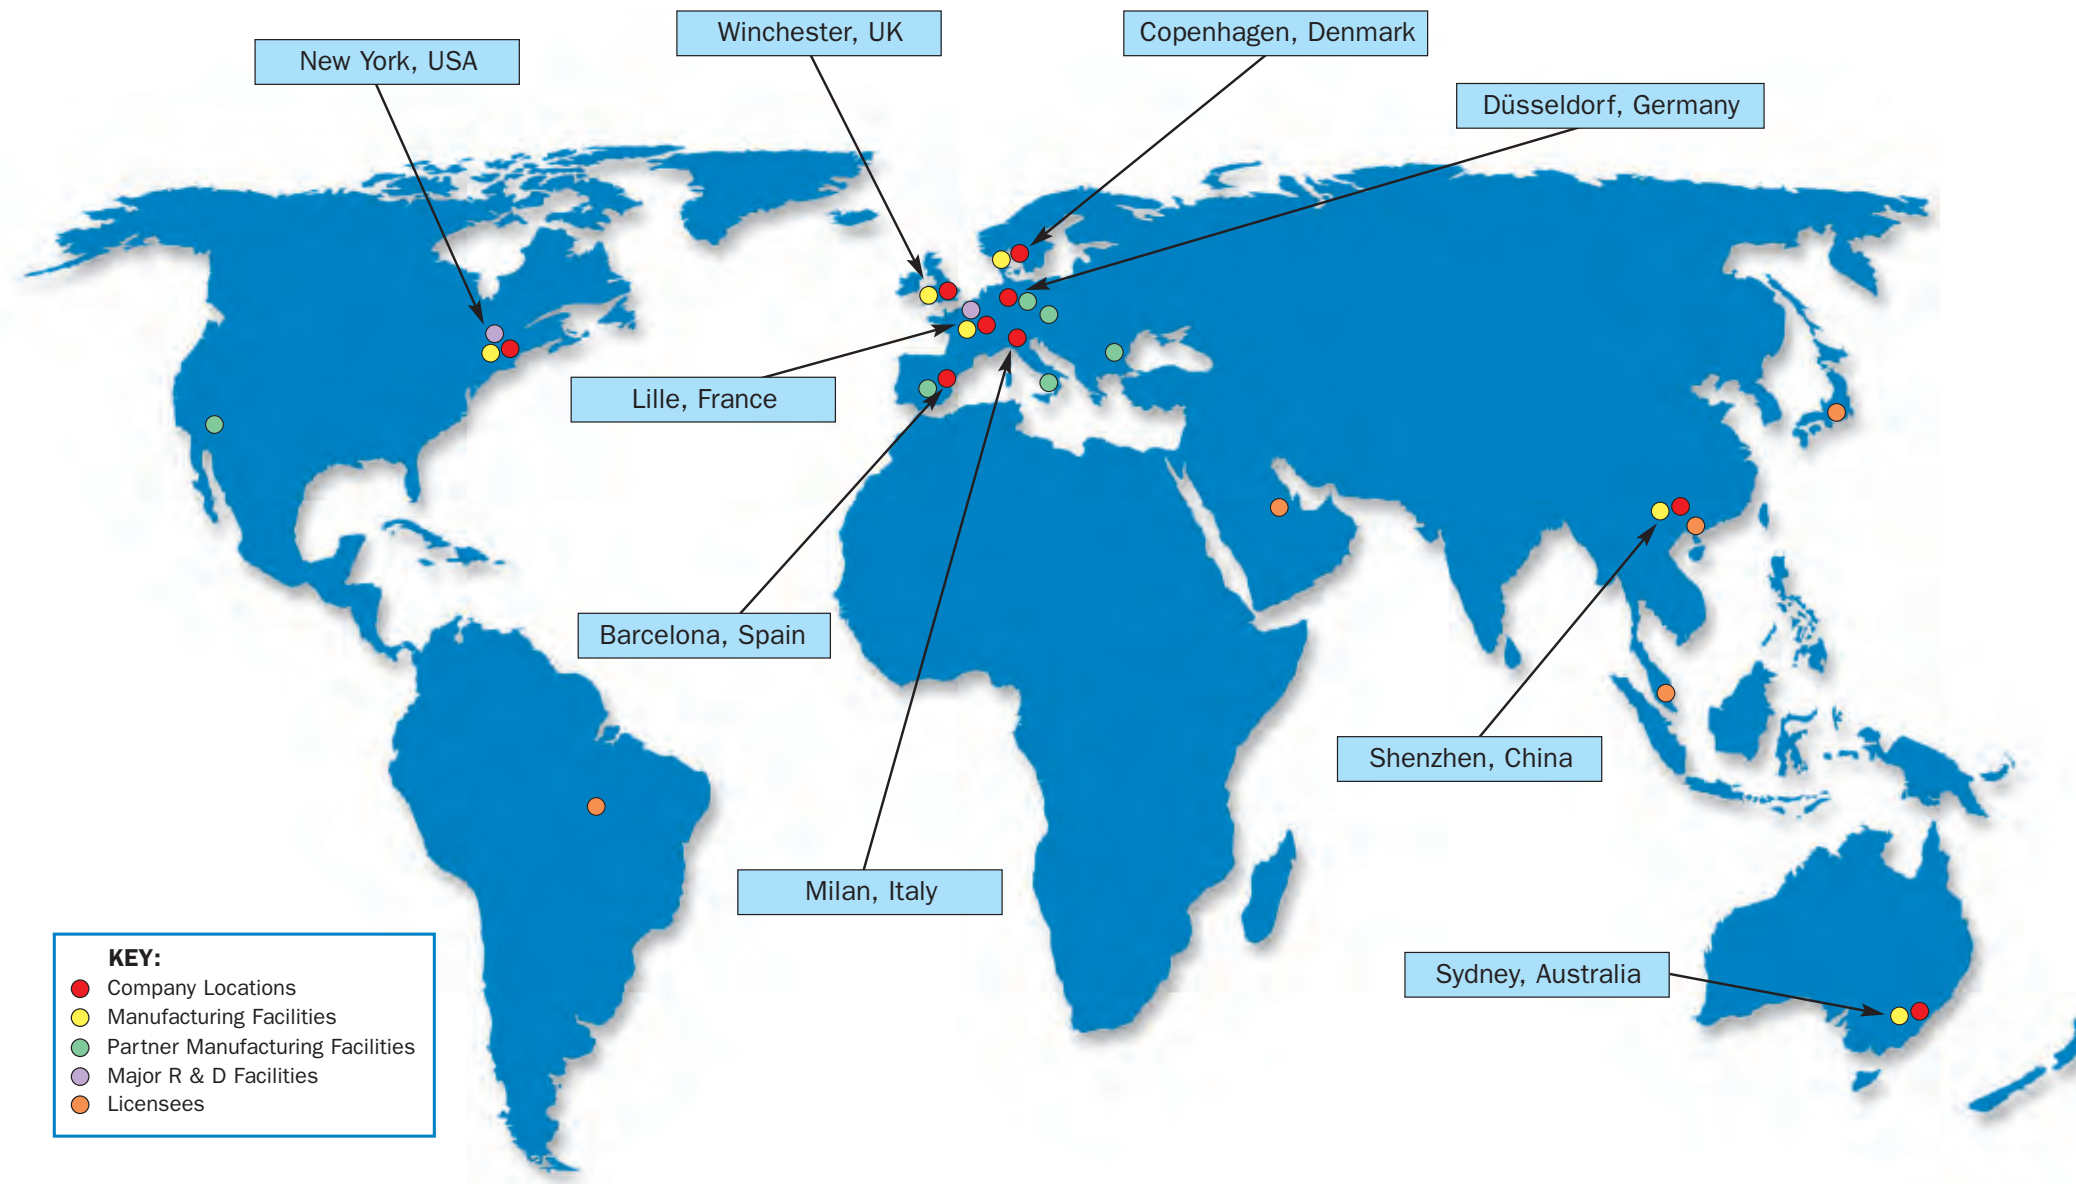

Heavy Duty Welding

## ABOUT US

Welcome to the IAC Group. In just over 60 years, we have developed into the world's largest provider of noise control products and systems. Our excellent reputation has been built on our commitment to design and manufacture top quality products that deliver the best acoustic performance available world-wide. When it comes to technical capability we excel and although our products are much imitated they are never matched.

Employing over 800 people, the company has two purpose-built Acoustic Research and Development Centres based in New York, USA, and in Lille, France, and manufacturing plants on six separate sites in the UK, China, France, Denmark, Australia and the USA. IAC's laboratories are used exclusively for new product development and the periodic, on-going testing of existing products so ensuring that performance data is consistently accurate. IAC's Global Headquarters are located in Winchester, UK, approximately 110km (70 miles) from London.

## WHAT WE DO

IAC offers imaginative solutions to an extraordinarily wide range of noise pollution and sound quality problems.

For example, we create facilities for testing jet engines and developing quieter motor vehicles. We build TV and radio studios and install soundproof rooms in hospitals for hearing testing (audiology). We shroud noisy plant and machinery with special acoustic enclosures, build road barriers, silence air conditioning systems and combat the noise emissions of large, powerful gas turbine engines. We install partitions in hotel function rooms and provide school children with the special facilities they need to learn foreign languages and practice playing their musical instruments. And our acoustic doors and windows can be found in almost every type of building you can think of.
